

Section 3: Encoding

Now that you are done with the videos of section 1, let's assess your learning. Here, are a few questions, followed by 4 options, out of which 1 is the correct option. Select the right option and validate your learning! The answers are provided in a separate sheet

Q1. Email replies can be computed from RFC822 header identifiers

- a. True
- b. False

Q2. Text requires unique neural network designs to build classifiers

- a. True
- b. False

Q3. Softmax is used in this area of a neural network

- a. Input
- b. Output

Q4. Neural network techniques for image recognition can be used on text

- a. True
- b. False

Q5. Which layer can reduce or pyramid the number of dimensions

- a. True
- b. False

Q6. Recurrent neural networks are generally faster than dense networks

- a. True
- b. False

Q7. Recurrent neural networks loop over the time series dimension

- a. True
- b. False
