

Answer Key

Question Number	Question	Answer
1	Embedding represents each word or ngram as a fixed size vector of floating point	True
2	Embedding increases the number of dimensions in a model	False
3	Which of the following are commonly used pretrained embeddings	GLOVE
4	Pretrained GLOVE vectors are available for download with an open license	True
5	Facebook FastText provides both word and ngram vectors	True
6	N-Grams can refer to both characters and words depending on context	True
7	FastText combines character ngram embeddings to create word embeddings for new or unknown words	True
