Section 5: A Deep Neural Email Processor

Now that you are done with the videos of section 1, let's assess your learning. Here, are a few questions, followed by 4 options, out of which 1 is the correct option. Select the right option and validate your learning! The answers are provided in a separate sheet

Q1. Swagger handlers can be implemented with classes

    a. True
    b. False

Q2. Preloading the machine learning model boosts performance per REST request

    c. True
    d. False

Q3. Docker allows packaging both code and data

    a. True
    b. False

Q4. Docker containers can run on which environments

    a. All
    b. AWS
    c. Azure
    d. Kubernetes

Q5. Docker can expose REST services with the EXPOSE command

    a. Ensembles
    b. Aggregates

Q6. Swagger allows POST of entire email files as strings

    a. True
    b. False

Q7. Connexion understands and can serialize NumPy types

a. True
b. False
