Answer Key

Question Number	Question	Answer
1	Email replies can be computed from RFC822 header identifiers	True
2	Text requires unique neural network designs to build classifiers	False
3	Softmax is used in this area of a neural network	Output
4	Neural network techniques for image recognition can be used on text	True
5	Which layer can reduce or pyramid the number of dimensions	Pooling
6	Recurrent neural networks are generally faster than dense networks	False
7	Recurrent neural networks loop over the time series dimension	True
